NEW
VIGOR
RANGE

Beat the Budget Bogey with DIN Quality Workshop Tools

Leading tool distributor Damar International is the exclusive UK supplier for the new Vigor Equipment range of automotive hand tools. Tool buyers seeking value have until now faced a quality lottery. The Vigor range has been engineered to DIN standards by a major German manufacturer of premium quality tools, specifically to address these issues.

The Vigor automotive workshop tools range has been assembled with typical German obsession with detail – there are tools for virtually every task. The tools are attractive, ergonomic and designed to be a joy to use and major aid to productivity.

At the core, Vigor offers sockets, wrenches, spanners, combination ratchets, adapters, screwdrivers, pliers, drill sets and all the common tools you would expect. The range also extends to more specialised, but extremely useful, tools such as pullers for trim and cap removal, oil filter wrench sets, LED lights for awkward places and track rod wrench sets together with many other useful tools.

Having the right hand tool is no use if you cannot find it. To keep your hand tools tidy and in good condition cases are available and trolleys in capacities from 72 to 204 pieces. Tools are also available for safe storage in moulded storage modules.

Brian Martin, managing director of Damar International commented, “We have been distributing premium-quality professional workshop tools for over 25 years and are the official suppliers to dealers for several prestige automotive manufacturers. We have been concerned about budget hand tools infiltrating the market and aware that buyers were often taking an expensive gamble. We are happy to sell the Vigor range alongside our existing premium products knowing they offer DIN quality and exceptional value for money.”
